EXPERIENCE

MOBILE ENGINEER | Contract | PIF | Denmark

April, 2023 – Present

PIF - Pay it Forward is an app that makes it easy and fun to send gifts to each other over the phone. PIF hopes to spread joy to the world and contribute to a more generous society. With the PIF app, you can now send a surprise to anyone of your choice and hopefully, that person will - Pay it Forward.

- Created modular, responsive templates using modern techniques and libraries(such as Expo and Eas).
- Worked with a proficient understanding of code conversion tools.
- converted UI mockup design to mobile templates.
- Integrated RESTful APIs into the app.

MOBILE ENGINEER | Contract | BEAM | Lagos

May, 2023 – July, 2023

BEAM is a platform that provides a seamless and convenient way for users to book online therapy sessions with licensed therapists. The mission is to promote mental well-being and make therapy accessible to everyone. With BEAM, you can easily connect with therapists who are dedicated to helping you achieve a healthier mind and happier life.

- Developed user-friendly, responsive templates using cutting-edge tools like React Native and Expo.
- Collaborated closely with design teams to ensure the app aligns with the platform's goals and user expectations.
- Implemented appointment scheduling features that allow users to select preferred therapists, session times, and appointment durations.
- Ensured a streamlined booking process by incorporating user-friendly navigation and clear call-to-actions.

MOBILE DEVELOPER and CDO | Co-founder | Farmlify

January, 2023

Farmlify is an AI platform that makes it easy for farmers to plant and scale their business. Farmlify is a farm assistant that helps farmers detect diseases in crops and plants. It is equipped with chat and images where a user can take pictures of crops and will detect its diseases as well as proffer the best solution to cure. It helps with investment plans too.

- Design and implement the overall app architecture, considering factors like code modularity, scalability, and maintainability.
- Develop and optimize reusable UI components to ensure consistent and responsive user experiences across different devices.
- Integrate APIs and backend services to fetch and send data.
- Carried out code Reviews as the Mobile Team Lead.
- Implement state management using tools like simpler-state to manage app-wide states and data flow effectively.

FRONTEND DEVELOPER(MOBILE) | Contract | AWAY-NAIJA | Canada

October, 2022 - April, 2023

Away-naija is a vibrant social media platform designed to bring together Nigerians living in Canada, fostering a strong sense of community and connection among fellow compatriots. The platform is dedicated to creating a space where Nigerians can share their experiences, support one another while building lasting relationships across the Canadian landscape.

- Participate in code reviews, testing, and debugging to identify and resolve issues and improve the overall quality of the application.
- Actively participate in the development process, including design, implementation, and testing.
- Continuously improve development processes and practices to increase efficiency and quality.
- Collaboration with backend developers in creating seamless interfaces.
- Employed user-friendly navigation and intuitive interfaces to facilitate easy profile creation, content sharing, and engagement.
